Contractor
Management Software

Challenges

01 Siloed approaches for labour workforce, vehicle and equipment management causes liabilities

02 Liabilities lead to less and less accountability – esp. missing data capture and analytics.

03 Lack of cohesive decision-making and missing metrics affect operational performance.

04 Lack of HSE policy coverage and monitoring magnifies issues for stakeholders.

05 Planning-management roadblocks cause systemic operations to breakdown, often.

Deliverables

Conform to contractor qualification and contractor on-boarding.

Improve collaboration with real-time feedback and performance metrics.

Enhance contractor safety with analytics.

Permit and authorization based digital platform.

Reduce the potential for contractor-related incidents.
